ENERGY NOX AND SERVICE

#WEBREATHEMISSIONCONTROL

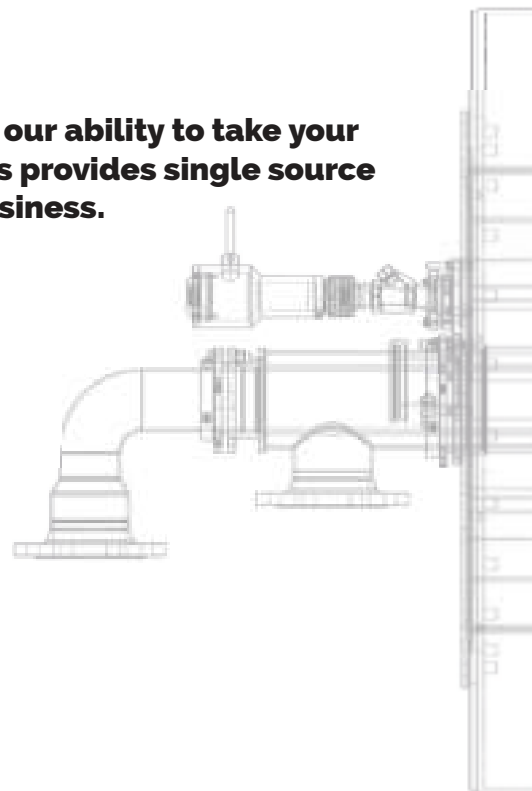

Your energy ? Our concern !

What separates L-inc® from the competition is our ability to take your energy recovery project from start to finish. This provides single source responsibility, allowing you to focus on your business.

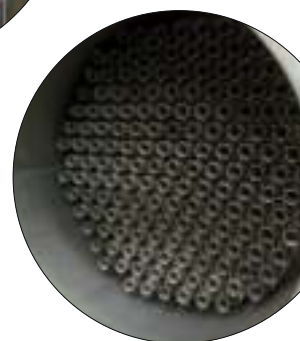

Range of WHR technologies :

- Air-to-Air Heat Exchangers (Shell & Tube, Plate Type)
- Air-to-Water Heat Exchangers (Economizers)
- Air-to-Steam Heat Exchangers (Waste Heat Boilers)
- Air-to-Fluid Heat Exchangers (Oil, Glycol Loop)

PRODUCT SPEAR HEAD

ENERGY NOX AND SERVICE

#WEBREATHHEMISSIONCONTROL

You want to reduce your NOx ?

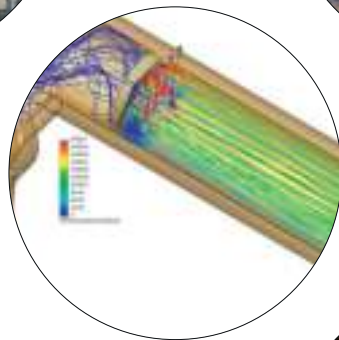

We know-how to design and install an SCR or SNCR system for new or existing combustion plant and combine this with state-of-the-art post-combustion emission control. Proper flow and temperature distribution is modelled by our L-inc® in-house specialist in Computational Fluid Dynamics (CFD).

SERVICE SPEAR HEADS

- Engineering
- Retro-fit and optimise your combustion process
- Commissioning & start-up
- Maintenance & spare parts

L-inc® will not only improve process efficiency and reduce pollutants, but also increase capacity and/or improve product quality. We retrofit your existing dryer-or combustion system !
